For Professional Embalming Use Only.
Before using, read Material Safety Data Sheet.

All-Purpose External Embalming Seal

<u>Product</u>	<u>Size</u>	<u>Item No.</u>
Perma-Seel Liquid	13 oz. bottle	525303
Perma-Seel Liquid	7 oz. bottle	525310
Perma-Seel Spray	6 oz. aerosol can	525295
Perma-Seel Solvent	13 oz. bottle	525402

Description

Perma-Seel is an external embalming sealant that can be either brushed or sprayed on. The transparent waterproof “skin” it forms is tough yet supple so it will not crack, peel, loosen, or blister. It is widely used to confine, protect, and seal off a variety of damaged skin conditions – such as open lesions, burns, incisions, sores, skin slip, and putrefied areas.

Features

As a handy aerosol spray or as a brushable liquid, Perma-Seel keeps a quick-acting, clean, and convenient sealant right at the embalmer’s fingertips and ready for instant use. Perma-Seel dries rapidly into a strong and flexible moisture-repellent layer that is impervious to body exudates, acids, and embalming chemicals. It seals off offensive odors and remains pliable and tough even when dry. Perma-Seel adheres firmly to tissue or fabric. But it dissolves instantly in Perma-Seel Solvent – no mess, no problems.

Applications

Perma-Seel seals air out and moisture in. Use it over surgical or embalming incisions, with or without sutures. Spray or brush on for external sealing of wounds, restorative packs or on diseased or putrefied areas. Apply on burns, lesions, amputations, or sores. Use Perma-Seel to confine skin slip and gangrenous areas. Also excellent for holding bandages securely in place.
